Helping **ALL**
children and
youth with
neurodisabilities
thrive.

Who we are

Kids Brain Health (KBH+) is a dynamic, collaborative ecosystem on a mission to scale up practical, evidence-based programs, products, and services, proven solutions that improve the lives of children and youth living with neurodisabilities and their families.

KBH+ bridges the gap between project and practice, connects promising ideas with growth partners, and supports the next generation of health innovators — fuelling our mission to help all kids and families reach their full potential.

Our impact

(As of June 2026)

KBH+ brings innovation to life by working with families, partners, and experts to turn research into real-world impact.

\$115.7
million

Government grants and matching funds raised over 17 years.

5
continents

Home to KBHN-funded projects in Africa, Asia, Australia, Europe, and North America.

55,000+
stakeholders

Engaged across KBH+ events, training, workshops, and projects.

2,800+
trainee engagements

Supporting students, fellows, and professionals who have made significant contributions to the neurodisability field.

Our Focus Areas

Early identification

Early identification enables timely support during critical stages of brain development. KBH+ is advancing earlier diagnosis—bringing it into infancy so children and youth can access care when it matters most.

Effective interventions

Early intervention can change the course of a child's development. KBH+ is leading in brain health to ensure that children, youth, and families can access the supports they need when they matter most.

Family support

Families of children and youth with neurodisabilities face challenges that impact every part of daily life. KBH+ works alongside those with lived experience to strengthen support systems and help children and youth reach their full potential.
