

NEW Early Detection and Intervention Toolkit for Cerebral palsy (EDIT-CP)

Early detection and evidence-based early interventions are key to better outcomes for young children with cerebral palsy:

Please share this **NEW** Early Detection and Intervention Toolkit for Cerebral Palsy (EDIT-CP) with primary care providers, rehabilitation specialists, and families [CLICK HERE](#)

EARLY DETECTION

Recommendation: There is an international guideline for early identification of cerebral palsy in high-risk infants using standardized assessments and neuroimaging

NEW! EDIT-CP toolkit includes early attributes that can be detected by primary care providers and by caregivers

Early Detection Toolkit: [CLICK HERE](#)

For Canadian Neonatal Follow-up programs: [CLICK HERE](#)

EARLY INTERVENTION

Recommendation: Begin early interventions without delay; once referred for diagnosis, can simultaneously refer for therapies

NEW! EDIT-CP toolkit includes evidence on more than 20 early interventions, for clinicians and for families
